

# Welcome!

Hotel Nestor is named after the last farmer here on the property, and my great-grandfather, Nestor Johansén. The property belongs to the farm Arvids-Västergård, which dates back to the early 1700s.

Hotel Nestor is today run as a family business and was founded in 2009 by my parents; Artist Pia Rousku and Industry Designer Frank Hellgren.

Now the hotel is owned and run by me, William Hellgren. I became a part of the hotel business in 2016 when I opened my restaurant , Back Pocket, in the building's renovated barn.

The original part of this building, built of cinder stone from Dalsbruk in Kimito, was built around 200 years ago and has been home to the farm's cows, pigs and hens for several decades up to 1974, when the farming activities on the property came to an end.

Over the next 25 years, the farm was largely uninhabited and served as the summer residence for the family, who for many years had been living in Stockholm, Sweden.

In 1999, a new chapter in the old farm's history began when my family chose to realize an old dream of replacing their hectic city life with a rural existence. They wanted to go back to their original roots at the old family farm in the Turku archipelago.

Once here, the idea of giving the old barn a new life grew stronger and stronger. The result stood ready in the summer of 2009, when the new hotel was opened and a new chapter in its already 200 years old story began..

Today, old memories still echo within the thick stone walls of the old barn building, while life continues stronger than ever. New meetings are taking place and new stories begin in my ancestors' old barn, which became a hotel.

*We wish you a warm welcome to Hotel Nestor, and we hope that you will enjoy your stay here with us.*

## Restaurant Back Pocket

I was raised in a home of artists, where art and culture have always been around. As long as I can remember, I have known that I wanted to work with art and creativity. After trying different disciplines, I finally found my own artistic identity as a chef.

For me, cooking represents a multidimensional art form that includes so many things; the visual aspect, the thoughts behind the dish, the combinations of textures and flavours, temperature variations hot and cold! By painting and building an edible image using all these elements, I want to take people on a voyage to revive old childhood memories and create new impressions and taste experiences.

The journey that brought me here started when I was 16 years old and discovered the joy and creativity that the cooking offered me. After studying and working at a Michelin restaurant in Stockholm, I decided to return to Korpo and start my own project. Restaurant Back Pocket was born in Hotel Nestor.

Here, we want to offer a relaxed and elegant dining experience. Our menu is designed with the love for seasonal products combined with a desire to pay tribute to our Nordic raw materials. In addition, we also aspire to integrate different food elements and techniques by using cooking methods that originate in diverse gastronomic cultures around the globe.

We want to be proud of the food that we serve. Therefore, it is essential for us that every dish we serve is prepared from scratch in our kitchen. Quality and simplicity are a good summary of what we want to convey.

Restaurant Back Pocket is serving a 6- course tasting menu daily during the high season every day between 4:00 and 10:00 pm.

For the rest of the year (October- April) we are open on Fridays and Saturdays. We are open for group orders and private events all year around.

## To See & Do in Korppoo

The Barefoot Path is an exhibition that focuses on environmental and site-specific art.

It invites the public to take part of the unique nature of the archipelago and experience contemporary art that has been created to interact with the environment.

Every year the exhibition explores the human - nature relationship and nature's impact on us in one or another way.

**Korpoström Archipelago Center** is a visitor center for science, nature, art and culture. The Archipelago center works in an interdisciplinary manner to create exhibitions and happenings with interesting angles of approach on matters and phenomena that are peculiar to the archipelago.

The people co-operating are scientists, artists, cultural workers, volunteers and public officials. The center also works as station for marine biology (Åbo Akademi University), as base for the Archipelago National Park and as guest harbor and conference center. <https://skargardscentrum.fi/>

**Korpo Church**, named after the Archangel Mikael, is an important part of our national cultural heritage both architecturally and for its interior. The building was completed in its present form around the year 1450. During the summer months, the church is open to the public every day between 10 am and 5 pm.

**Korpo Local Folklore Museum** is located approx 800 m from the Korpo market square towards Hvasby at Strömmavägen 39. In the lush grounds there are ten different buildings which were moved there from different parts

of the island. These include a farmstead, store rooms and a windmill. There is also a fishing hut located down on the museum shore. The museum is maintained and run by the local people on a voluntary basis to conserve and preserve an older way of life in Korpo for future generations.
